Implementation Schedule – ERS 10

Implementation Schedule - EGW 11

1. Introduction

This Service Guide describes the services available to customers of Intrado's enterprise (business) 911 products and services ("Customers"), including Emergency Routing Services ("ERS") and Emergency Gateway ("EGW"), Phone Discovery Manager, and Desk Alert™ software ("Software"). It also includes applicable license terms for the Software and terms relating to implementation services.

Some of the terms in this Service Guide do not apply to all Customers. See below to determine which sections will apply:

Product/Service	Product Code in Quote Begins With	Technical Support Section 2	License Terms Section 3	Maintenance Terms Section 4	Implementation/ other Services Section 5
Monthly Recurring Services, including ERS	EN, RE, PL	X*			
Hardware	HW	X*		X	
Software	SW	X*	X	X	
Annual Maintenance & Support	PROSR-EGW			X	
Implementation or other Professional Services	PROSG-PPKG, PROSG-PISHRR				X

*For ERS and other monthly recurring services, technical support is included without additional charge. For hardware and software, technical support and annual maintenance and support is included without charge for the first year after delivery, and is available for purchase thereafter, payable annually in advance.

2. Technical Support

2.1. What is included

- 24x7x365 telephone, web, and email support
- Access to online support at <https://support.911.intrado.com>, which allows Customer to submit tickets, receive software updates, release information, and updated product documentation. Customer must register to obtain a user name and password in order to access the extranet services.
- Product use guidelines and available configurations
- Resolution of software defects, usage and configuration
- Documentation irregularities
- Customer-owned Intrado hardware fault diagnosis and resolution

Note: With the exception of hardware faults, all work is performed remotely, according to Customer's security requirements.

2.2. What is excluded

The following are not covered by technical support services. However many of the services can be purchased as professional services.

- Configuration change request requiring validation retesting or redesign; for example: provisioning a new IP address to connect to the ERS account, changing the IP address of the EGW, or provisioning additional PBX in the EGW
- Incidents traced back to faulty third party components (firewalls, switches, softswitch, NNI circuits, not managed by Intrado for either physical (hardware) or logical (configuration) reasons
- Problems and/or errors related to Customer failure to back up data
- Software or hardware not officially supported, validated or approved as specified in the applicable Intrado product documentation
- Software that is no longer covered under the Intrado EOL Policy (see Section 4.2 below). In addition, Intrado may require Customer to upgrade to a more recent Release to receive support services (patches and documentation) if the Release is older than 12 months.
- Repair any issue or support any product that: (a) has been altered, except by Intrado or an Intrado designated representative or in accordance with Intrado's written instructions, (b) has not been installed, configured, operated, repaired, or maintained in accordance with Intrado's instructions, (c) has been subjected to abnormal physical or electrical stress, misuse, negligence or accident, including damage to hardware components from spills, drops, power surge, or improper voltage selection on system's power supply, (d) has been operated outside of the environmental specifications for the product, or (e) when such malfunction, damage or other problem is caused by use with software or hardware that is not recommended by Intrado or that does not conform to the system requirements or specifications made available by Intrado.
- Other exclusions described in the relevant service description or terms

2.3. How to reach Intrado

- Customers can obtain support from Intrado through telephone, web, and email support for any Intrado product for which Customer is entitled to support services. Support is available 24/7 for all emergency issues by phone and five days per week, 9:00 am-6:00 pm EST for all other issues and inquiries.

Email	E911support@intrado.com
Phone	888 908-4167
Web (Support Portal)	https://support.911.intrado.com/
Mail	7150, Rue Alexander-Fleming Saint-Laurent (Québec) H4S 2C8 Canada

- Customers should be prepared to supply as much information as possible including:
 - Description (description of the problem or perceived symptoms)
 - Attachments (logs, traces, screenshots)
 - Date/time the problem/disruption was detected
- If the Customer calls the support desk, the support technician will create a trouble ticket, analyze the problem, and attempt to achieve problem resolution as quickly as possible.
- When sending an email, a trouble ticket/request is automatically created in the Support Portal. Customer can either continue to correspond with Customer's Intrado support representative via email or Customer can log-in to the Support Portal to manage the request. Either way, a seamless communications trail is applied to the request, which is viewable from the Support Portal.

2.4. Severity Levels and Escalation Guidelines

Severity levels are used to manage support resources and to resolve important issues as quickly as possible. The severity assigned to the ticket may be later updated (increased or decreased) after analysis. Severity changes are always preceded by a Customer consultation.

- 4 different severity levels may be assigned to trouble tickets

Severity Level	Information	Response Time (from receipt of notification)	Restoration Target (from time of engagement)
Emergency	Production systems that cannot route any 911 calls to the correct destination with two-way audio communication that meets acceptable voice-quality levels. Furthermore, no immediate workaround is available, and the issue requires immediate corrective action.	<4 hours	<5 hours
High	Production systems that cannot route some 911 calls to the correct destination with two-way audio communication that meets acceptable voice-quality levels. Furthermore, no immediate workaround is available, and the issue requires corrective action.	<4 hours	<2 days
Normal	Production system performance is degraded, there is partial feature unavailability to the Customer, or maintenance and backup processes have been significantly impacted. In all cases, a functional workaround is available. If redundant components are involved, failover to the secondary component is successful and redundancy is being restored.	<1 Support Business Day	<5 Support Business Days
Low	All requests for Lab or non-production systems. Minimal inaccuracies in documentation. Cosmetic flaws. No service impact to company or operations.	<3 Support Business Days	Situation dependent-No commitments on resolution time

- “**Response Time**” means Intrado’s acknowledgement that Customer has reported an issue. A support engineer will engage and be in contact with the Customer via various means depending on the severity level.
- “**Restoration Target**” means Intrado’s analysis and findings that allow Intrado to temporarily or permanently restore functionality and or availability of the service via a workaround or permanent fix.
- Escalation Guidelines

Support Tier	Title
Tier 1	NOC Support
Tier 2	On-call Resource
Tier 3	Service Account Manager
Tier 4	Services Manager
Tier 5	Executive Director

- Note: For specific contact information, please go to the support portal (<https://support.911.intrado.com>) and obtain the article entitled “Intrado Escalation Contacts.”
- It is possible to escalate to a higher tier of support at any time during the trouble ticket resolution process. During a service impairment situation (Support priority Level Emergency or High), escalation occurs based on a fixed procedure. Escalation within Intrado involves both defined and subjective decisions on the part of the support technician. Once basic troubleshooting procedures have taken place without resolving the issue, the support technician will make timely decisions about when to escalate and will identify the appropriate resources to resolve the issue.

2.5. Customer Responsibilities

- General
 - Provide a 24/7 contact number for use under exigent circumstances. The number, which is located in the Customer’s ERS account, can be used by the Emergency Call Response Center (“ECRC”) if an emergency callback fails. The ECRC will use this number as last resort to reach the distressed caller. In addition, the number may be used when Intrado detects a serious issue that needs to be resolved immediately and regular support contacts are not available.
 - Ensure that Intrado has the most up to date contact information on file. This information can be updated at any time, by contacting Intrado Technical Support or by contacting the assigned Intrado account manager.
 - Designate qualified technical resources to interact with Intrado support technicians. Customer’s designated resource(s) should read and be familiar with Intrado product and services documentation.
 - Contact and assist Intrado support technician with diagnostic procedures to identify the root cause of the problem
 - Perform verification and testing as required
 - Update PBX, softswitch, session border controller and firewall settings as required
 - Monitor and respond to system alarms and notifications
- Software
 - Provide, when requested, reasonable remote access to licensed software in order to investigate and troubleshoot technical issues. Remote access to Customer network would be performed using Customer’s or Intrado’s preferred sharing application
 - Download and load any applicable software from Intrado provided links
 - Deploy upgraded client applications (if applicable)
- Hardware
 - Provide the support technician with Customer’s hardware “service tag” and physical location
 - Assist Intrado support technician with diagnostic procedures to identify the root cause of the problem
 - In the event of a hardware failure, provide necessary physical access to Intrado’s designated field technician
 - Work with Intrado support technician to keep full security copies of any software and data
 - Store and maintain appropriate copies of any data

- **Maintenance.** Customer must provide Intrado with at least 24 hours' notice of any planned maintenance activities that may affect or prevent the successful routing of an E911 call. The Customer must provide the following information when making a maintenance notification:
 - Date, time, duration
 - Description of service impact
 - Enumeration of impacted network elements
 - Contact name, number and email
- **Interaction with PSAP**
- **Coordinate test calls with the local PSAP.**
- **Contact the local PSAP for address display issues caused by PSAP customer premise equipment ("CPE").**

2.6. Intrado Responsibilities

- **Product Maintenance/Major Releases.** Intrado will provide email notifications and announcements whenever new maintenance releases are made available. Latest system guides and release notes are always available on the support portal. In addition, the Intrado support engineer may recommend a system upgrade as part of the remedy to a specific support request.
- **ERS Network Maintenance.** Intrado will provide the Customer notice at least one week before any maintenance affecting activities. In general, Intrado network maintenance does not impact 911 services. The scheduled maintenance window is between 12:00 AM and 8:00 AM eastern standard time (EST) and may occur on weekdays or weekends. Intrado will provide Customer with the following information when making a maintenance notification:
 - Date, time, duration
 - Description of service impact
 - Enumeration of impacted network elements
 - Contact name, number and email

3. License Terms

Subject to the terms of the applicable Order and full payment of all applicable fees, Intrado grants to Customer a personal, nonexclusive, nontransferable, non-sublicensable, license to use the Software delivered to Customer, including virtual appliances and any software embedded in delivered hardware, at the location and on the number of servers, workstations and users or other applicable metric set forth in the Order or Customer's accepted purchase order, in accordance with the system specifications and requirements provided by Intrado. This license may be on a perpetual basis, or on a subscription basis for defined duration, as set forth in the applicable Order. All right, title and interest in and to the Software, including any customizations made to the Software, or updates or upgrades to the Software supplied by Intrado, will remain vested with Intrado and its licensors. Customer's rights to use the Software will terminate on notice from Intrado if Customer fails to comply with any provision of this Order, or at the end of the subscription period. The Software may require a new authorization key to function following the end of the applicable subscription period. On termination, Customer will destroy all copies of Software and associated documentation in its possession or control.

Customer will not itself, or through any affiliate, agent or other third party: (a) sell, lease or sublicense or otherwise transfer the Software; (b) decompile, disassemble, reverse engineer or otherwise attempt to derive source code from the Software; (c) modify or enhance the Software or write or develop any derivative software or any other functionally compatible, substantially similar or competitive products; (d) network the Software or use the Software to provide processing services to third parties, commercial timesharing, rental or sharing arrangements or otherwise use the Software on a service bureau basis; (f) provide, disclose, divulge or make available to, or permit use of the Software by any third party without Intrado's prior written consent; or (g) use or copy the Software except as reasonably required for archival purposes only.

4. Maintenance Terms

- **Release Availability.** Customer will be entitled to Releases, which are generally made available by Intrado to its Customers at no additional charge. Intrado is not obligated to develop or make available Releases. Releases will be compatible with the most current version of the operating system at the time the application Software Release is first made available. Customer's use of all Releases is restricted to the terms and conditions of the license under which the related Software was provided to Customer. Intrado's and its suppliers will retain all right, title and interest in all Releases.
- **Service Detail.**
 - Customer will provide Intrado with remote access to the Intrado Products and Customer's related systems for the purpose of providing the Support and maintenance Services. If Customer is unable to provide Intrado with remote access to its systems, Customer acknowledges that it will take significantly longer to identify and resolve issues.
 - When accessing Customer's systems, Intrado will:
 - inform Customer before any access is made;
 - make backup copies of configuration files before any work is performed;
 - not make changes to the Customer systems without Customer's prior authorization;
 - once authorized, make changes on stand-by units whenever possible; and
 - not retain any of Customer's sensitive customer information that may have been accessed or recorded, in paper or other formats, during the course of providing such services, and will securely dispose of any paper documents containing same.

4.1. Fees and Term

All fees for support and maintenance services are payable annually in advance, and are not subject to refund. Reinstatement of support and maintenance services that have lapsed for more than 60 days will incur a lapse charge of 150% of the support and maintenance fees that would have been owed during the lapsed period.

Support and maintenance services will be provided for one year commencing on the date of product delivery, and will be automatically renewed for additional one-year terms, unless either party does not renew the Services by providing 30 days' notice before the end of the applicable term. Any renewal will be on the terms and conditions of the then-current support and maintenance service terms (including then-applicable fees). Intrado will use good faith efforts to proactively notify Customer when the annual support and maintenance options are nearing expiration. An up to date support and maintenance contract with Intrado ensures uninterrupted support.

4.2. End of Life (“EOL”) Policy

4.2.1. Hardware Products

Intrado provides a specific End of Service Life date for a given product in writing when the Sales Discontinuation Date is announced. Such notifications will be provided to Customers in writing 180 days before the End of Service Life Date.

Regardless of the End of Service Life date, Intrado will honor the terms of any applicable warranty or any previously sold support maintenance agreements, which were purchased before the End of Service Life Date.

4.2.2. Software Products

Intrado follows industry standard practices regarding the support of its software for discontinued (EOL) products. Consistent with such standards, Intrado's policy is to support software for the most current version and one previous major version OR one year after the release, whichever comes first.

4.3. Changes to EOL Support Policy

Although every effort will be made to support EOL products in accordance with the EOL Support Policy, Intrado reserves the right to change its policy, as it deems appropriate. Intrado will announce any changes to the EOL Support Policy in writing to the Customer.

Note that Intrado may, at its discretion, stop offering Time and Materials support services prior to the End of Service Life Date.

5. Implementation Cooperation

Appendix A attached to this Service Guide describes a standard implementation timeframe for the Services, including Customer and Intrado responsibilities and key milestones (as herein attached, or as otherwise agreed by the parties, the “Implementation Schedule”). Each party will timely fulfill its obligations per the Implementation Schedule, and will make available all resources necessary to meet the Implementation Schedule, including, as applicable: personnel, facilities, circuits, APIs, network information, third party coordination, and timely approvals (each, an “Implementation Dependency”). Unless otherwise agreed, Implementation Dependencies will be completed within five business days after request.

Either party may notify the other if it has not timely completed an Implementation Dependency, and the party at fault will remedy the deficiency within ten business days. If Customer does not so remedy an outstanding Implementation Dependency following notice, then Intrado may, if not already commenced, begin charging for any minimum recurring fees due under the Order for the Services.

For third party dependencies outside of Customer’s control, Customer will promptly communicate any expected delay, and any remedies stated above will not apply.

Any modified or expanded Implementation Schedule agreed on by the parties will replace the attached Appendix A, and the above terms will continue to apply.

6. Implementation and Other Services

- Implementation services include the following:
 - Providing the Customer with remote installation and start-up assistance. An experienced professional services engineer will work with Customer, via phone and Internet connection, to advise, configure, and test;
 - Providing recommendations for product deployment and configuration;
 - Providing advisory and remedial support (product usage advice, software execution or functionality, interpretation of product technical documentation);
 - Scheduling delivery of the offering, in accordance with standard business practices and the earliest availability of Intrado professional services engineer(s);
 - Proposing a high level project task list outlining the key service steps for the deployment;
 - Assisting Customer with product configuration and integration with the telephony and data network;
 - Assisting Customer with Emergency Response Location (“ERL”) data validation and provisioning;
 - Assisting in the running product operational readiness testing that verify:
 - IP connectivity between the various solution components,
 - Feature configuration,
 - Fallback scenarios, and
 - System performance.
 - Participating in regular project meetings;
 - Assisting Customer with troubleshooting, and correct any deficiencies;
 - Monitoring the deployed product performance for a period of 30 days; and
 - Using remote access tools to facilitate problem solving, with Customer’s approval.
- Exclusions. The following are not included, unless specifically included in the quote:
 - Modifications to the Intrado supported software or hardware;

- Services outside of the standard hours of coverage;
- Services required due to improper treatment or use of the equipment or software by other than Intrado personnel;
- Services required due to unauthorized attempts by other than Intrado personnel to repair, maintain, or modify the equipment and/or software;
- Resolution of problems encountered due to 3rd party equipment and/or software;
- Code, code examples, commands, sample commands or modifications to code or commands; and
- Any onsite service.
- Professional services are provided in blocks of time, which must be scheduled by Customer at least two support business days in advance. The service hours are from 8:00 AM to 6:30 PM (Eastern Time), excluding weekends and Intrado holidays ("Business Hours"). Intrado will provide professional services outside of Business Hours ("Non-Business Hours") provided that Customer makes such a request at least two weeks prior to the date on which such Professional Services are required by Customer. Professional Services provided during Non-Business Hours will be provided at Intrado's standard fees for Professional Services, provided that the Customer will be billed for a minimum of six hours for each day on which such Professional Services are provided during Non-Business Hours.
- Professional services will be considered completed by Intrado and accepted by the Customer when: (a) acceptance testing is successfully completed, or (b) Customer has formally accepted and signed-off on the professional services.
- Customer Responsibilities.
 - Assign resources and prepare procedures for installation, administration, testing, operation, and support;
 - Provide a project manager to liaise with Intrado personnel for all aspects of this installation activity;
 - Provide Intrado with configuration details on the current data and telephony network configuration, topology, and any other information requested by an Intrado professional services engineer;
 - Perform project planning based on Customer's requirements and Intrado's recommendations;
 - Ensure that all site preparation, compatibility requirements, circuits, and other specified service prerequisites are met;
 - Configure all Customer premise equipment components;
 - Physically place, install, and connect the product on Customer premises; and
 - At Customer's approval, provide access to the Product via the appropriate remote access method, as required to improve product installation time.
- Conditions of Services.
 - If security restrictions apply to any or all Customer systems, the Customer may be required to assume additional responsibilities for maintaining the system and/or software.
 - The implementation service is limited to the most current version of software and/or firmware.
 - The ability of Intrado to provide the services depends on the Customer's local resources and their full and timely cooperation with Intrado, as well as the accuracy and completeness of any information and data the Customer may provide Intrado.
 - The Customer is responsible for contacting the vendor for support and for repair or replacement of defective third-party products not supplied or supported by Intrado.

7. Glossary

“End of Service Life Date” means the date an Intrado product will no longer be supported.

“Maintenance Release” means a software release to correct Software Failures.

“Release(s)” means a Maintenance Release, Update or Upgrades, either individually or collectively, as applicable.

“PSAP” means Public Safety Answering Point.

“Software Failure” means reproducible behavior that deviates in a material respect from the Software

“Support Portal” means online ticket/request tracking system and documentation repository available to registered Customers.

“Update” means a software release to correct any Software Failures and/or add features to the Software and is typically represented by a change in the yy component of a Version Number.

“Upgrade” means a software release to correct any Software Failures, add functionality and/or new features to the Software and is typically represented by a change in the xx component of a Version Number.

“Version Number” means the three-part version number in the form xx.yy.[zzzz] that identifies a Release.

Appendix A

Implementation Schedule – ERS

Milestone	Duration	Deliverable	Owner
Initiation and Planning Phase	20 days		
Customer Kickoff.	15 days	Kickoff call, Project Plan, ERS account creation.	Intrado/Customer
System Planning.	5 days	Start ERL Planning, E911 Process Planning.	Customer
Execution Phase	55 days		
ERS Connectivity.	15 days	Connectivity Form.	Intrado/Customer
System Configuration.	20 days	Customer Premise Equipment (CPE) configuration.	Customer
Location Manager Deployment.	10 days	LM client configured/deployed.	Customer
911 Provisioning.	10 days	ERS provisioned with ELRs, network maps, and endpoints.	Customer
Operational Readiness Testing (ORT)	10 days		
ORT	9 days	Completed test plans documented in ORT	Intrado/Customer
Go-Live	1 days	ORT results sent to customer and ERS account status set "Live".	Intrado/Customer

- This schedule reflects a standard deployment of 85 days following Order Effective Date. Additional steps or requirements may be needed for non-standard deployments or unique circumstances.
- All references to "days" are to business days.

Implementation Schedule - EGW

Milestone	Duration	Deliverable	Owner
Initiation and Planning Phase	20 days		
Customer Kickoff.	15 days	Kickoff call, Project Plan, ERS account creation.	Intrado/Customer
System Planning.	5 days	Start ERL Planning, E911 Process Planning, and Discovery Planning.	Customer
Execution Phase	55 days		
Equipment to be Ordered and Installed.	5 days	V-EGW Software.	Customer
ERS Connectivity.	15 days	Connectivity Form.	Customer
System Configuration.	20 days	Customer Premise Equipment (CPE) configuration.	Customer
Emergency Gateway (EGW) Configuration.	20 days	EGW configuration complete.	Intrado/Customer
EGW Managed Services (If applicable).	15 days	Managed services VPN.	Intrado/Customer
Location Manager and Desk Alert.	10 days	Intrado clients configured and deployed.	Customer
911 Provisioning.	10 days	EGW provisioned with ELRs, network maps, and endpoints.	Customer
Operational Readiness Testing (ORT)	10 days		
ORT	9 days	Completed test plans documented in ORT ORT results sent to customer	Intrado/Customer
Go-Live	1 days	and ERS account status set "Live".	Intrado/Customer
- This schedule reflects a standard deployment of 85 days following Order Effective Date. Additional steps or requirements may be needed for non-standard deployments or unique circumstances. - All references to "days" are to business days.
