TELECOMMUNICATIONS SERVICES TARIFF

SECTION 1 - APPLICATION AND REFERENCE (CONT’D.)

1.1 TARIFF FORMAT

1.1.1 OUTLINE STRUCTURE

Paragraph Numbering Sequence - There are various levels of alphanumeric coding. Each level of coding is subservient to its next higher level. The following is an example of the numbering sequence suggested for use in tariffs.

2.1
2.1.1.
2.1.1.1.

1.1.2 SHEET NUMBERING

Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the Tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

1.1.3 SHEET REVISION NUMBERS

Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14.

1.1.4 CHECK SHEETS

Check Sheets: When a tariff filing is made with the Maryland Public Service Commission, an undated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the Maryland Public Service Commission.
SECTION 1 - APPLICATION AND REFERENCE (CONT’D.)

1.1.5 RATE TABLES

Within rate tables, four types of entries are allowed:
Rate Amount
The rate amount indicated the dollar value associated with the service.

A dash “-”
The dash indicates that there is no rate for the service or that a rate amount is not applicable under the specific column header.

A footnote designator “[1]”
The footnote designator indicates that further information is contained in a footnote.

“ICB”
ICB indicates that the rates for the associated service will be determined on an Individual Case Basis.
1.2 EXPLANATION OF CHANGE SYMBOLS

SYMBOL EXPLANATION

(C) To signify changed regulation, term or condition

(D) To signify discontinued material

(I) To signify rate increase

(M) To signify material moved from or to another part of the Tariff with no change, unless there is another change symbol present

(N) To signify new rate or regulation or other text

(R) To signify rate reduction

(T) To signify a change in text but no change in rate, regulation, term or condition

2.3.9 SPECIAL SERVICES

2.3.9.1 General

2.3.9.1.1 The rates and charges quoted in the Tariffs of the Company contemplate the use of service arrangements, equipment and facilities in quantities and types regularly furnished by the Company. Where equipment, facilities, or service arrangements are requested which are not provided for in the Company’s applicable Tariffs, monthly rates and one-time charges, such as nonrecurring and construction charges, will apply based on the circumstances in each case.

2.3.9.1.2 These special equipment and service items will be provided whenever, in the judgment of the Company, there is a valid reason for providing the service requested. In such cases, the Company reserves the right to require an initial contract period commensurate with relevant circumstances.

2.3.9.1.3 The rates and charges specified contemplate that work will be performed during regular working hours and that work once begun will not be interrupted by the Customer. If, at the request of the Customer, work is performed outside of regular working hours, either to meet the Customer’s convenience or because the time allowed is insufficient to permit completion during regular hours or if the Customer interrupts work which has begun, the Customer may be required to pay any additional costs incurred.

2.3.9.1.4 The rates and charges quoted in the Tariffs of the Company contemplate the use of standard procedures and practices for furnishing service, equipment and facilities. 2.3.11.2 If a Customer cancels a Service Order Agreement or terminates services before the completion of the term for any reason whatsoever other than a Service Interruption, the Customer agrees to pay to the Company termination liability charges, as defined below. These charges shall become due as of the effective date of the cancellation or termination.

2.3.11.3 The Customer's liability for early cancellation or termination of service shall be equal to the following:

2.3.11.4 To the extent that there is no other requirement for use by the Company for facilities specially constructed at the request of the Customer pursuant to Section 2.3.9, termination charges in additional to those described in this Section may apply as determined on an Individual Case Basis.

2.3.11.5 Inclusion of termination liability by the Company in this tariff or a contract does not constitute a determination by the Commission that the termination liability imposed by the Company is approved or sanctioned by the Commission. Customers shall be free to pursue whatever legal remedies they may have should a dispute arise.
2.3.12 INITIAL CONTRACT PERIOD

2.3.12.1 Service is provided on month-to-month or on a term agreement basis. The Initial Contract Period is one (1) year unless otherwise specified in this tariff or mutually agreed upon by contract. Penalties may apply for early termination of the Service Order Agreement (SOA).

Termination shall not relieve the Customer of its obligation to pay any charges incurred under the Service Order Agreement and this tariff prior to termination. The rights and obligations that by their nature extend beyond the termination of the term of the Service Order Agreement shall survive such termination.

2.4.2.4 In the event a Customer is indebted to the Company for charges and services previously rendered in Maryland, or for service under one or more accounts at the same location, and the Customer does not pay the charges or satisfy such indebtedness, the Company may charge and bill such indebtedness against other accounts of this Customer.

2.4.2.5 In the event that payment from a Customer is less than the total amount of all charges owing to the Company and the Customer does not specifically designate the manner in which he wishes to apply said payment, then the Company may apply all or any part of the payments received to such accounts or indebtedness in any manner that the Company deems appropriate.

2.4.2.6 Except as otherwise specified, where the rate to be charged for a particular service is determined by applying a percentage or similar factor to a quoted rate, and such computation results in a fraction, the charge for the service shall be computed to the nearest cent, a half cent being increased to the next higher cent.

2.4.2.7 The furnishing of services, equipment and facilities and any indebtedness resulting therewith shall not result in a lien, mortgage or other security interest in any real or personal property of the Customer, unless such indebtedness has been reduced to judgment.

2.4.2.8 Service may be discontinued or refused to a Customer for the nonpayment of any sum for service furnished in the State of Maryland or for the provision of facilities which also have been provided in Maryland.
2.4.2 PAYMENT OF BILLS (CONT’D.)

2.4.2.9 Unless otherwise specified, in the event it becomes necessary for service to be discontinued to a Customer for nonpayment, a written notice of at least seven days (measured from the date of mailing) will be given to the Customer advising the Customer of the amount due and the date by which the same must be paid to avoid service being discontinued. If the Customer fails to pay or make suitable arrangements for payment by said due date, the Company may suspend the service or discontinue the service and remove any or all of the Company’s equipment from the Customer’s premises.

2.4.2.10 Payment of bills for service may be made by any means mutually acceptable to the Customer and the Company. Payment that is not honored or paid by the payer’s designated financial institution will be considered as nonpayment. 2.4.2 PAYMENT OF BILLS (CONT’D.)

2.4.2.14 The Company will not be responsible if a Customer’s service is discontinued after payment has been remitted, unless the payment is timely, as set forth in 2.4.2.12, or, if the payment is not timely, the requirements of 2.4.2.13. have not been met.

2.4.2.15 Incomplete Calls

Billed balances upon which late charges are calculated do not include any charges billed as local taxes.

2.4.3.3 Collection procedures and temporary disconnection of service are unaffected by the application of a late charge. The late payment charge does not extend the time for payment or otherwise enlarge or change the rights of a Customer. Notice of intention to pay late will not avoid this charge.

2.4.3.4 The late payment charge does not apply to the following:

- Bills mailed more than ten days after bill date.
- Final bills.
- One-time miscellaneous bills.
- Billed amounts under dispute that are resolved to the Company’s satisfaction in the Customer’s favor.

2.4.4 ADJUSTMENT OF CHARGES

2.4.4.1 Service Interruptions

2.4.4.1.1 For the purpose of applying this provision, the word “interruption” shall mean the inability to complete calls either incoming or outgoing or both. Interruption does not include, and no credit allowance shall be given for, service difficulties such as busy circuits or other network and/or switching capacity shortages or as further defined.

2.4.4.1.2 Credit for failure of service or equipment will be allowed only when failure is caused by or occurs in the equipment owned, provided, and billed for, by the Company. The Company agrees to abide by the regulations associated with interruptions in service as specified by Code of Maryland Regulations 20.45.05.09 as amended from time to time, except as waived by the Commission.

2.4.4.1.3 The credit allowance will not apply where service is interrupted by the negligence or willful act of the Customer or the failure of facilities provided by the Customer, or where the Company, pursuant to the terms of the Tariff, suspends or terminates service because of unlawful or improper use of the facilities or services, or any other reason covered by the Tariff or as further defined.

2.4.4.1.4 No credit allowance shall be made for interruptions due to electric power failure where, by the provisions of this Tariff, the Customer is responsible for providing electric power.

2.4.4.1.5 Should any such error, mistake, omission, interruption, failure, delay, defect or malfunction of equipment or facilities result in an interruption or failure of service to a Customer for more than eight hours during a continuous 24-hour period after being reported by the Customer or discovered by the Company, whichever occurs first, an appropriate adjustment shall be made automatically by the Company to the Customer’s bill. The adjustment, unless further defined, shall be a credit allowance on the monthly bill of 1/30 of the tariff monthly rate for all services and facilities affected by such interruption or failure for each occurrence of more than eight hours in a continuous 24-hour time period after notice by the Customer or discovery by the Company, whichever occurs first. Credit allowances in any billing period shall not exceed the total charges for that period for the services and facilities that are affected by the interruption or failure.

2.4.4.1.6 In addition and not by way of limitation, in the event that there is a delay in installation of service, if any service date is promised, or any failure to service or properly maintain the items of service as provided for herein concerning maintenance or any failure to repair or replace the items of service as provided in 2.4.4.1.2, then the refunds provided in 2.4.4.1.2 shall be the exclusive remedy against the Company.

Acceptance of the provisions of Section 2.5 by the Commission does not constitute its determination that any disclaimer or warranties or representations imposed by the Company should be upheld in a court of law.

Failure by the Company to assert its rights pursuant to one provision of this tariff does not preclude the Company from asserting its rights under other provisions.

In view of the fact that the Customer has exclusive control of its communications over the facilities furnished it by the Company, and of the other uses for which facilities may be furnished it by the Company, and because of unavoidable errors incidental to the services and to the use of such facilities of the Company, the services and facilities furnished by the Company are subject to the following terms, conditions and limitations.

2.5.1.1 Limitations

2.5.1.1.2 The remedy against the Company for an interruption or failure of service resulting from errors, mistakes, omissions, interruptions, failures, delays, or defects or malfunctions of equipment or facilities shall be as follows: At the Company’s option, the Company shall either repair or replace any item of its facilities or defective part thereof at Company’s expense.

2.5.2 MAINTENANCE AND REPAIR

2.5.2.1 All ordinary expense of maintenance and repair in connection with services provided by the Company is borne by the Company unless otherwise specified.

2.5.2.2 At the Customer's request, non-service-affecting maintenance and repair may be performed outside the Company's regular business hours or, in the Company's sole discretion and subject to any conditions it may impose, in hazardous locations. In such cases, charges based on the cost of labor, material, and other costs incurred by or charged to the Company will apply. If installation is started during regular business hours but, at the Customer’s request, extends beyond regular business hours into time periods including, but not limited to, weekends, holidays, and/or night hours, additional charges may apply.

2.5.2.3 Nonrecurring charges do not apply to repair services.

2.5.3 DATABASE ERRORS OR OMISSIONS

In no event shall the Company, its officers, directors, agents, servants, or employees, be liable for direct, incidental, punitive, or consequential damages for damages or costs arising from any such interruptions, errors, or omissions, whether a claim for such liability is premised upon breach of contract, breach of warranty, fulfillment of warranty, negligence, strict liability, misrepresentation, fraud, or any other theories of liability.

5.1 9-1-1 EMERGENCY SERVICES

9-1-1 Emergency Services are telecommunications services that permit a Public Safety Answering Point (PSAP) to receive emergency calls placed by dialing the number 9-1-1 and/or emergency calls originated by personal communications devices.

9-1-1 Emergency Services include 9-1-1 Routing and Transfer Services that use a call management system to either directly perform the selective routing of an emergency call to the appropriate PSAP, or may be used to hand-off the call to a separate 9-1-1 Service Provider (possibly a legacy E9-1-1 Selective Router) for call completion to the appropriate PSAP. 9-1-1 Emergency Services also provide services of call bridging and post call activity reporting.

9-1-1 Emergency Services include data management and delivery service, 9-1-1 ALI Services. 9-1-1 ALI Services provide PSAPs control over ALI data management and reporting. 9-1-1 ALI Services offer features such as “drill down” metric reporting capabilities for wireline, wireless, and VoIP 9-1-1 calls. The solution includes a web interface for data queries and MSAG management.

9-1-1 Emergency Services are offered subject to the availability of facilities. The Customer is the Governing Authority that orders service and is responsible for the payment of charges and compliance with the terms and conditions of this tariff.

9-1-1 Emergency Services are only available under contract with a minimum term agreement of one (1) year.
5.1.1 9-1-1 ROUTING SERVICE

9-1-1 Routing Service is a public safety grade, specialized managed network for processing 9-1-1 calls that allows the PSAP to accommodate new technologies while simultaneously enabling control over 9-1-1 call routing operations. 9-1-1 Routing Services utilizes a redundant, secure IP infrastructure. Facilities and nodes are geographically diverse and are equipped with physically redundant data communications and power equipment that allow for continuous operation and reliability. 9-1-1 Routing Service delivers emergency calls from both traditional and TDM voice and IP-based networks.

Intrado 9-1-1 Routing facilitates interoperability and allows for specialized management of different call types. The Customer can designate, capture, and report on specific instructions for handling each of the following call types:

Wireline: Supports traditional wireline emergency calls originating from an end office, central office and/or enterprise PBX over standard based Centralized Automatic Message Accounting (CAMA), both analog and digital interfaces, SS7 and PRI interfaces.

Wireless: Supports delivery of wireless 9-1-1 calls to assigned PSAPs. Carriers having the capability to provide wireless handset ANI, cell site and sector and/or longitudinal and latitudinal (x,y) coordinates in the appropriate format, may connect directly to the 9-1-1 Routing Service.

VoIP: Supports delivery of VoIP emergency calls originating from a VoIP Service Provider.

SECTION 5 – SERVICES (CONT’D.)

5.1    9-1-1 EMERGENCY SERVICES (CONT’D.)

5.1.1    9-1-1 ROUTING SERVICE (CONT’D.)

5.1.1.1    9-1-1 Routing Service Features

5.1.1.1.1 Automatic Number Identification (ANI)

ANI is the feature by which the telephone number or other related routing (pANI) number associated with an inbound 9-1-1 caller is received by the Company’s 9-1-1 Emergency Services and passed on to the proper PSAP. The ANI is also used to determine the proper PSAP to receive the inbound call.

5.1 9-1-1 EMERGENCY SERVICES (CONT’D.)

5.1.1 9-1-1 ROUTING SERVICE (CONT’D.)

5.1.1.1 9-1-1 Routing Service Features (Cont’d.)

5.1.1.2 9-1-1 Routing Options

Selective Routing
The routing of a 9-1-1 call to the proper PSAP based upon the location of the caller. Selective Routing is typically accomplished by mapping the ANI to an ESN that has been derived based on the caller’s location. The ESN maps to a specific routing rule that identifies the PSAP and possible alternative destinations.

Trunk Only Routing
Inbound trunks can be designated to route all calls to a given destination, usually a specific PSAP. If Trunk Only Routing is not specified, the system will attempt to perform Selective Routing.

Default Routing
When an incoming 9-1-1 call cannot be selectively routed due to the reception of an ANI number that is either not stored in the selective router data base, unintelligible ANI or when no ANI number is passed, a predetermined call route will be chosen and the caller will be terminated to the PSAP based upon the incoming trunk facility the call is passed over.

PSAP Abandonment Routing
If a situation arises where a PSAP must be closed or evacuated, this feature provides specific routing instructions for delivery of calls to recovery locations.

5.1.1 9-1-1 ROUTING SERVICE (CONT’D.)

5.1.1.1 9-1-1 Routing Service Features (Cont’d.)

5.1.1.1.3 9-1-1 Transfer Options

Fixed Transfer
Fixed transfer is a feature that enables a PSAP call taker to transfer a 9-1-1 call to a secondary destination (possibly another PSAP) by dialing a pre-assigned speed dial code or by use of a single button on an approved Customer telephone system that dials the appropriate code.

Selective Call Transfer
Selective Call Transfer is a feature enabling a PSAP call taker to transfer an incoming 9-1-1 call to another agency by dialing a pre-assigned speed dial code associated with police, fire or medical agencies or by use of a single button on an approved Customer telephone system that dials the appropriate code. The specific transfer destination is determined by the caller’s originating location as specified by the ESN.

Manual Transfer
A PSAP call taker may transfer an incoming call manually by depressing the hook switch of the associated telephone or the "add" button on approved Customer telephone system and dialing either an appropriate seven or 10-digit telephone number.

Alternate Routing
The Overflow Call Disposition transfer feature enables the ability for callers to be terminated either to a previously designated alternate call center, a prerecorded message or to a busy tone when all PSAP trunks are busy.

5.1 9-1-1 EMERGENCY SERVICES (CONT’D.)

5.1.1 9-1-1 ROUTING SERVICE (CONT’D.)

5.1.1.1 9-1-1 Routing Service Features (Cont’d.)

5.1.1.1.4 Call Event Logging

The Call Event Logging feature delivers reporting information containing the ANI received from a 9-1-1 call, the identity of the incoming trunk the Selective Router received the call over, the identity of the outgoing PSAP trunk the call is terminated to, and the date and time the call was delivered to its target destination, transferred and/or disconnected.

5.1.2 9-1-1 ALI SERVICES

5.1.2.1 MSAG Management

9-1-1 Emergency Services includes a data management and administration tool that automates the viewing and communication of updates, insertions, and deletions to the MSAG database.

5.1.2.2 MSAG Build Services

Company facilitates the creation and maintenance of the MSAG utilizing recognized National Emergency Number Association (NENA) recommended guidelines.

5.1.2.3 English Language Translation (ELT) Management

ELT information provides the names of fire, EMS and police jurisdictions associated with each ESN so that it may be delivered with the ALI to the PSAPs at the time of the 9-1-1 call. The requests are validated for accuracy and either updated into the database or referred back to the PSAP for resolution. Upon completion of the transaction, notification is provided to the Customer.
5.1 9-1-1 EMERGENCY SERVICES (CONT’D.)

5.1.2 9-1-1 ALI SERVICES (CONT’D.)

5.1.2.4 ALI Record Management
ALI Record Management is the collection of service order records from Telephone Service Providers (TSPs), validation of those records against the MSAG, and storage of the records for the generation of the ALI database.

5.1.2.5 ALI Database Updates
After processing and validating record updates, Company posts ALI records for call routing and for retrieval and display by the PSAP during 9-1-1 calls.

5.1.2.6 ANI/ALI Discrepancy Resolution
An ANI/ALI discrepancy occurs when an ALI record delivered to a PSAP does not match the information of the caller. Company will investigate ANI/ALI discrepancy reports and refer each discrepancy to the respective TSP for resolution.

5.1.2.7 Misroute Resolution
An ANI/ALI misroute occurs when a 9-1-1 call is delivered to the incorrect PSAP. Company investigates ANI/ALI misroute reports and refers each misroute report to the TSP for resolution.

5.1.2.8 No Record Found (NRF) Resolution
An NRF occurs when the ANI provided does not exist in the ALI database and/or when NRF is displayed at the PSAP. Intrado will resolve or refer each NRF to the respective TSP for resolution.

5.1.2.9 Local Number Portability (LNP) Processing
Intrado supports LNP, which allows customers to switch from one TSP to another without changing their phone numbers.

5.1.2.12 ALI Metrics Reporting
Company provides access to reports that provide details on data transactions, the number of records processed, and the number of errors.

5.1.3 9-1-1 EXCHANGE ACCESS

9-1-1 Exchange Access provides one-way call delivery trunks from the 9-1-1 Routing Service to the PSAP. The 9-1-1 Exchange Access trunks are conditioned to allow delivery of ANI to the PSAP. They also allow signaling from the PSAP to the 9-1-1 Routing Service to invoke special features of the 9-1-1 Routing Service, such as transfer, speed dialing, etc.

5.1.4 ALI DATABASE CONNECTIONS

ALI Data Access Connections provide the PSAP network access to the ALI Database for ALI Delivery.

Notes:
1. Tiers are based on the number of persons served per PSAP located within the boundaries of a Customer's E9-1-1-System:
   - Tier I: Less than 18,500 Persons Served per PSAP
   - Tier II: 18,500 to 30,000 Persons Served
   - Tier III: 30,001 to 50,000 Persons Served
   - Tier IV: 50,001 to 100,000 Persons Served
   - Tier V: More than 100,000 Persons Served

2. Persons Served per PSAP is calculated by taking the county population as estimated by the U.S. Census Bureau data (http://www.census.gov/popest/counties/) and dividing by the number of PSAPs in the county served by the Company (number of PSAPs includes primary, secondary and backup PSAPs). For example: if a county’s population is 90,000, and the Customer has two PSAPs (one primary and one backup) to which the Company provides service, persons served per PSAP for that Customer is 45,000 (90,000 ÷ 2 PSAPs = 45,000); i.e., Tier III, and the monthly charge Customer will pay will be $6,543.00 (45,000 person per PSAP x $0.0727 x 2 PSAPs = $6,543.00). For Customers with PSAPs that serve an area that crosses county boundaries, or encompasses only a portion of a county, the number of persons served will be determined based on a percentage of area served in each county. The number of persons served is subject to annual review and sizing using the most recent U.S. Census Bureau data.

3. 9-1-1 Routing Service and 9-1-1 ALI Service are provided as a package. Customer requests to obtain these services separately will be handled individually.

4. Additional charges will apply for 9-1-1 Exchange Access and ALI Data Access Connection, which are MultiProtocol Label Switching (MPLS) services and are offered under contract where, in the Company’s judgment, suitable facilities are available (see Sections 2.3.9 and 2.3.10).

5. Additional charges may also apply for other Local Exchange Services offered under this tariff or by other local exchange carriers in connection with the provisioning of E9-1-1 service to the Customer.
